VW and Audi 2.0T chain driven TSI engines from 2008 to 2013 have some issues relating to the timing chain tensioner. The affected engine codes are: CCTA, CBFA, CAEB, CAEA, CDNC and CPMA. Starts with a "C", think C for Timing Chain. On these engines, there is an early version of a timing chain tensioner that may fail and collapse.

Used Audi A4 for Sale in Denver, CO | Cars.com

The EA111 series of internal combustion engines was introduced in the mid-1970s in the Audi 50, and shortly after in the original Volkswagen Polo. It is a series of water-cooled inline three- and inline four-cylinder petrol and Diesel engines, in a variety of displacement

needed to be replaced.

Timing Tensioner Problems of the 2010 Audi A4

For model year 2017 and later, Audi has changed their scheduled maintenance intervals to fall on the 10's rather than the 5's. Below, you will find detailed explanations of the tasks performed at each scheduled maintenance visit from the initial complimentary 10,000 mile scheduled maintenance all the way through the 130,000 mile scheduled maintenance.

2.0T Timing Chain Tensioner Failure | Class Action Suit ...

Move the valve timing 180 degrees out of phase and the engine will not run, because spark occurs following step 4, over a cylinder freshly voided of exhaust. This is the essence of your question. All the engines that VW made would not run under these conditions, with one exception: The AEG. Earlier engines use a distributor.
