Free Software. Carnegie-Mellon University's statistics group has a library of many different statistics packages, including Bayesian packages. It can be accessed here.. Although CMU archives the R package, it's best to go to the R Project (CRAN) homepage, since you'll probably get the most recent version of it.

Bayesian Computation with R focuses primarily on providing the reader with a basic understanding of Bayesian thinking and the relevant analytic tools included in R. It does not explore either of those areas in detail, though it does hit the key points for both.

to generate such an integer in R. When you go home today, download R and begin reading Chapter 1 of Using R for Introductory Statistics if you bought the book. Also, read the R Help document I have posted on the course webpage when you go home. Example 1.3: The article listed below in the New York Times from April 25,

Exercises for "Bayesian Computation with R" Rainer Hirk & Kurt Hornik WS 2019/2020 1. This problem deals with the analysis of the daily exchange rates Bitcoin/US dollar in year 2015. We treat an AR(1) process to the  $r_t$  time series of log returns:  $r_t = \alpha + \rho r_{t-1} + \epsilon_t$ ; where  $\epsilon_t \text{ iid} \sim N(0, \sigma^2)$  and  $t$  is the day indicator.

Bayesian Computation with R introduces Bayesian modeling by the use of computation using the R language. The early chapters present the basic tenets of Bayesian thinking by use of familiar one and two-parameter inferential problems. Bayesian computational methods such as Laplace's method, rejection sampling, and the SIR algorithm are ...

This is a collection of practical exercises from old courses, mostly my old module in "Bayesian Computation". Unless otherwise stated, references to lecture notes refer to the "Bayesian Computation" notes. The exercises use R and BUGS. Both R and BUGS are available in the School of Mathematics and Statistics.
