(5) Network Dynamics: Population Models . Networks are powerful conduits for the flow of information, opinions, beliefs, innovations, and technologies. We begin by considering how these processes operate at the level of populations, when we can't necessarily observe the network itself, but only its effects on aggregate behavior.

~~sol3—Networks Fall 2015 David Easley and Jon Kleinberg ...~~  
Easley and Kleinberg have written a masterful introduction to networks. This book successfully combines the game theoretic and algorithmic approaches to the study of social, economic and communication networks. It is lively, interesting, readable and accessible. It is a pleasure to teach using this book and never a dull moment for the students."

Networks: Fall 2015 Homework 3 Solutions David Easley and Jon Kleinberg (1) We know that in a second price auction bidding your true value is a dominant strategy— that is, no matter what the others do you are better off bidding truthfully. So the fact that bidders 3 overbids does not affect bidder 1's optimal bid. He should bid  $v_1 = 3 / 4$ . (2a) Yes, it is optimal for the buyers to bid ...
