In 1919, Clessie Lyle Cummins founded Cummins Engine Company to improve diesel technology and produce the world's finest engines. His vision launched a company that today is a global leader, producing diesel engines for applications ranging from heavy-duty trucks and consumer pickups to industrial mining and oil drilling.

The hybrid diesel locomotive is an incredible display of power and ingenuity. It combines some great mechanical technology, including a huge, 12-cylinder, two-stroke diesel engine, with some heavy duty electric motors and generators, throwing in a little bit of computer technology for good measure. This 270,000-pound (122,470-kg) locomotive is designed to tow passenger-train cars at speeds of ...

The Ford Super Duty engine is a range of V8 engines that were manufactured by Ford Motor Company. Introduced in 1958, the Super Duty engines replaced the Lincoln Y-block V8 (alongside the smaller Ford MEL V8 engines).. By the end of the 1970s, the use of the Super Duty engine began to decline in heavy trucks in favor of diesel-fueled engines; in medium-duty trucks, variants of the similar ...

controlled fuel injection systems in heavy-duty engines appeared in the Detroit Diesel Series 92 in 1985 and the Series 60 in 1987 [2151]. Caterpillar applied it to the 3176 in 1988 [2043]. The unit injectors used in these engines lent themselves well to early adoption of solenoid actuated electronic fuel injectors.
