[PDF] ICF-Guide_to_Helicopter-Ship_Operations.pdf - Free ... Helicopter operations are commonly used on ships for crew changes, Pilot transfer (embarkation and disembarkation), emergency situations as MEDEVAC (medical evacuation) and/or rescue. They are considered to be complicated high risk operations, as they involve personnel / equipment and crafts other than vessel's and they demand accuracy, training and clearly established procedures.

Helicopter operations have been increased, compared to past times and it is possible for the crew to successfully handle a relative situation. Therefore, it is important that the crew have adequate training and to be familiarized with the related risks. There are too many parameters that affect such operations. Weather is one of most important.
