~~Journal of Computing::Performance Analysis of Learning ...~~
The PACM Series on Measurement and Analysis of Computing Systems publishes original research of the highest quality dealing with performance of computing systems, broadly construed. We recognize that critical insights into key design trade-offs in computer or network systems have historically be obtained using a broad set of tools: benchmarking and experimental evaluation, mathematical ...

performance evaluation of learning classifiers, we have divided our work flow diagram as shown in Fig.1 into three different phases: 1. Feature Extraction Using MFCC (Mel-frequency cepstral coefficients) 2. Estimation of likelihood of clean and noisy isolated digit Using Hidden Markov Model (HMM) 3. Evaluating Classifiers recognition rate.

SIAM Journal on Computing (SICOMP) aims to provide coverage of the most significant work going on in the mathematical and formal aspects of computer science and nonnumerical computing. Submissions must be clearly written and make a significant technical contribution. Topics include but are not limited to analysis and design of algorithms, algorithmic game theory, data structures, computational ...

~~Journal of Parallel and Distributed Computing—Elsevier~~
The theory and practice of computing and operations research are necessarily intertwined. The INFORMS Journal on Computing publishes high quality papers that expand the envelope of operations research and computing. We seek original research papers on relevant theories, methods, experiments, systems, and applications.

The Journal of Educational Computing Research (JECR) is a peer-reviewed, interdisciplinary scholarly journal that publishes research reports and critical analyses on educational computing to both theorists and practitioners. The Journal features articles useful for practitioners and theorists alike. This journal is a member of the Committee on Publication Ethics (COPE).
