[Master of Engineering Science \(Biomedical Engineering\) -](#)

A Bachelors and Masters of Engineering in just 5 years. The Graduate School of Biomedical Engineering is officially a graduate school, but we offer a unique opportunity to undergraduate students who are interested in studying Biomedical Engineering. You can complete both your Bachelors and Masters degrees in just five years - that's at least 6 months less than if you had done them separately.

[Biomedical Engineering | UNSW Engineering](#)

The Master of Biomedical Engineering caters for students with either a medical/biological science or engineering/physical science background who want to further their education in this unique area. It is designed to apply engineering principles to developing technologies and problem solving in a diverse range of health care related fields.

[Graduate School of Biomedical Engineering](#)

Meet the health challenges of the future with the Master of Engineering (Biomedical) at Australia's leading university.* Gain the specialist skills required to create new medical treatments, instruments and devices. * Times Higher Education World University Rankings 2019 .

[Undergraduate study | Graduate School of Biomedical ...](#)

Two exciting high-profile researchers join the UNSW team. The Graduate School of Biomedical Engineering at UNSW welcomes two new academics: ARC Future Fellow, Dr Guozhen Liu and Professor Ewa Goldys, Deputy Director of the ARC Centre of Excellence...

[Master of Biomedical Engineering at UNSW Sydney | The Good ...](#)

A biomedical engineer can look at a medical problem and analyse it in engineering terms to find a solution. Materials Science is the underlying science of high-performance materials such as metals, ceramics, polymers and composites.

[Master of Engineering Science at UNSW | UNSW Degree Finder](#)

This program is integrated to provide fundamental engineering skills with an undergraduate focus on an engineering discipline and specialist postgraduate level training in Biomedical Engineering. At the end of the program successful candidates will graduate with a Bachelor in Engineering (Honours) and a Masters in Biomedical Engineering.

[Handbook - Program - Biomedical Engineering - 8660](#)

Master of Biomedical Engineering UNSW Sydney This discipline focuses on the adaptation and application of engineering principles to biomedicine.

[UNSW Handbook Program - Engineering \(Hons\)/Biomed Eng - 3768](#)

A 4-year Bachelor of Engineering degree with honours (WAM >= 65) or; A 4-year Bachelors degree in a biomedical health-related discipline* with honours (either embedded or as a single honours year) (WAM >= 65). A graduate diploma in biomedical engineering, such as 5449 - Engineering (Biomedical Eng) offered by the GSBmE or the equivalent.

[Master of Biomedical Engineering | UNSW Engineering](#)

■ Biomedical engineers apply engineering analysis and techniques to problems in medicine and life sciences. They bridge the gap between clinical medicine and the increasingly complex world of medical technologies. By the end of this degree, you will be able to develop systems to maintain and enhance life, design body parts...

[Graduate Diploma of Biomedical Engineering at UNSW | UNSW ...](#)

* Averages as calculated using the UNSW Postgraduate Coursework Entry Calculator. ** Health-related disciplines including medicine, allied health sciences, biomedical sciences, veterinary sciences. (b) Administration A student's program will be administered by the Graduate School of Biomedical Engineering in the Faculty of Engineering.

[Biomedical Engineering | UNSW Degree Finder](#)

Tim Broadbent, Master of Engineering Science Biomedical Engineering focuses on the adaptation and application of engineering principles to biomedicine. Graduates solve problems in a range of healthcare-relates fields such as implantable bionics, drug-delivery systems, medical imaging, radiotherapies, orthopaedic devices, telemedicine, robotic surgery, and cell and tissue engineering.

[Masters Of Biomedical Engineering Unsw](#)

Master of Biomedical Engineering. The quality of teaching at UNSW is very high, and access to cutting-edge research happening right on campus keeps the study interesting. This discipline focuses on the adaptation and application of engineering principles to biomedicine. Graduates solve problems in a range of healthcare-related fields such as...

[Master of Biomedical Engineering at UNSW | UNSW Degree Finder](#)

Biomedical Engineering applies engineering principles to the development of technologies and solutions in a range of healthcare-related fields, including implantable bionics, drug delivery systems, medical imaging, radiotherapy, orthopaedic devices, robotic surgery, cell and tissue engineering, physical rehabilitation and others.

[Handbook - Program - Engineering \(Honours\)/Biomedical ...](#)

A graduate diploma in biomedical engineering (such as UNSW Graduate Diploma 5449 or equivalent) with a minimum 70% average* * Averages as calculated using the UNSW Postgraduate Coursework Entry Calculator. ** Health-related disciplines including medicine, allied health sciences, biomedical sciences, veterinary sciences.

[Materials Science and Engineering \(Honours\)/Biomedical ...](#)

A student may apply for credit towards the program as per the UNSW Recognition of Prior Learning Policy and Procedures. For example, a student with a 4-year engineering honours degree could obtain a maximum of 48UOC of advanced standing. If the maximum credit is given, a student must still complete the following:
